Tools & Platforms	GitHub, Netlify, Vercel, Microsoft Office, Canva
Other	Python, Responsive Design, UI/UX Principles
Soft Skills	Problem Solving, Attention to Detail, Quick Learner, Teamwork

EXPERIENCE

Freelance Frontend Developer 2024 – Present
Self-Employed *Karachi, Pakistan*

- Designed and developed responsive websites for various personal and client projects using HTML, CSS, and JavaScript.
- Built and deployed projects on Netlify and Vercel, ensuring fast load times and cross-device compatibility.
- Continuously improved UI quality by applying modern design principles and clean code practices.

PROJECTS

Task Organizer. An intuitive and responsive task management app to help users organize daily activities with ease. Features a clean UI, smooth interaction, and seamless task tracking to boost productivity. Built with HTML, CSS, and JavaScript. ([View Project](#))

Resume Generator. A smart tool that allows users to create professional resumes in minutes by filling in their details, previewing the design, and downloading a polished PDF. Built using HTML, CSS, and JavaScript. ([View Project](#))

OLX Clone. A responsive OLX-style classified listings website built using HTML, CSS, and Bootstrap, featuring clean layouts and essential listing features for a seamless browsing experience. ([View Project](#))

Blog Website. A sleek and responsive blog platform built with a minimalist layout and smooth UI for distraction-free reading across all devices. ([View Project](#))

Furniture Website. A modern, elegant furniture showcase site with smooth navigation and a clean layout built using HTML and CSS. ([View Project](#))

EXTRA-CURRICULAR ACTIVITIES

- Participated in **FEMHACK** Hackathon (organized by SMIT), demonstrating collaborative problem-solving and rapid development under time constraints.
- Participated in **Quarter 4 Hackathon** under the Governor Sindh GenAI, Web3 & Metaverse Initiative, applying AI and modern web skills in a competitive setting.
- Actively maintain a personal portfolio website (alishba.dev) showcasing projects and frontend development work.
- Continuously expand skills through self-directed learning in React, Next.js, TypeScript, Python, and AI tools.
